

CHATBOAT

PROJECT NAME:- SAARTHI AI

PRESENTED BY:- BITTU KUMAR

DEPARTMENT :- B.TECH CSE (AI&ML)

PRN :- 250205241002

SANDIP UNIVERSITY

DATE :-

Introduction

- **Saarthi AI is an AI-powered chatbot developed using Python and Generative AI technology.**
- **It can understand user queries and provide intelligent responses in multiple languages such as English, Hindi, and Bhojpuri.**
- **The goal of Saarthi AI is to make communication with technology simple, interactive, and accessible for everyone.**

Objectives

- **Build an intelligent chatbot using AI.**
- **Provide quick and accurate responses.**
- **Support multiple languages.**
- **Improve user experience through natural conversations.**
- **Demonstrate practical applications of Generative AI.**

Technology Stack

➤ **Programming Language**

✓ **Python**

➤ **AI Model**

✓ **Google Gemini API**

➤ **Development Environment**

✓ **Visual Studio Code (VS Code)**

➤ **Technologies Used**

✓ **Artificial Intelligence**

✓ **Natural Language Processing (NLP)**

✓ **Generative AI**

System Architecture

User Input → Saarthi AI → Gemini API → AI Processing → Response Generation → User Output

Working Process

- User enters a question.
- Saarthi AI sends the query to Gemini API.
- AI processes the request.
- Response is generated.
- User receives the answer instantly.

Features of Saarthi AI

- **Intelligent Question Answering**
- **Multi-Language Support**
- **Fast Response Time**
- **User-Friendly Interface**
- **Continuous Conversation Capability**
- **Educational and Informative Responses**
- **Easy Integration with Python Applications**

Demo Output

Example 1

You: What is CPU in short answer?

Saarthi AI: The CPU (Central Processing Unit) is the brain of a computer, responsible for executing instructions, performing calculations, and managing the overall operations of the system.

Example 2

You: Artificial intelligence kya hai in short answer?

Saarthi AI: आर्टिफिशियल इंटेलिजेंस (AI) एक ऐसी तकनीक है जो मशीनों को इंसानों की तरह सोचने, सीखने, समझने और समस्याओं को हल करने की क्षमता देती है।

Example 3

You: Ka haal ba?

Saarthi AI:Ham theek baani! Rauaa kaisan baani?
(I am fine! How are you?)

Example 4

You: Ham bhi thik baani.

Saarthi AI:Bahut achchha! Ee jaan ke khushi bhayil ki rauaa bhi theek baani.

Future Scope

- **Voice Input and Voice Output**
- **Mobile Application Development**
- **Chat History Storage**
- **Personalized Recommendations**
- **Offline AI Support**
- **Integration with Educational Platforms**

Applications

Education

- ✓ Helping students learn concepts quickly.

Customer Support

- ✓ Providing instant assistance.

Information Retrieval

- ✓ Answering user queries efficiently.

Language Assistance

- ✓ Supporting communication in multiple languages.

Conclusion

- **Saarthi AI is a Generative AI-based chatbot developed using Python and Gemini API. The chatbot successfully understands user questions and provides intelligent responses in English, Hindi, and Bhojpuri and so on .**
- **This project demonstrates the practical implementation of Artificial Intelligence and Natural Language Processing in real-world applications.**

Thank You!

Project: Saarthi AI
